

Midterm Task 3. Shopping Cart Program

Calugay, Jam Donna P.
ACT 205

Code:

```
menu = {'Burger': 35.00,  
        'Tacos': 50.00,  
        'Fries': 20.00,  
        'Iced Coffee': 25.00}  
  
cart = []  
total = 0  
print("----- M E N U -----")  
for key, value in menu.items():  
    print(f"{key:12}: ₱{value:0.2f}")  
print("-----")  
  
# accept user choice/input  
while True:  
    food = input("Select an item from the menu/q to quit: ")  
    if food.lower() == 'q':  
        break  
    elif food not in menu:  
        print("Item is not in the menu, please choose again.")  
    else:  
        cart.append(food)  
  
# display user input  
print("\nYour Orders are.....")  
for food in cart:  
    total += menu.get(food)  
    print(food, end=" ")  
  
print(f"\nTotal Purchased: ₱{total:0.2f}")  
  
# Customer details  
name = input("\nEnter Customer Name: ")  
age = int(input("Enter Customer Age: "))  
  
# Senior discount if 60+  
if age >= 60:  
    discount = total * 0.20  
    total -= discount  
    print(f"Senior Discount (20%): -₱{discount:0.2f}")  
  
print(f"\nCustomer: {name}")  
print(f"Final Total: ₱{total:0.2f}")
```

Sample Output

```
C:\Users\COMLAB\AppData\Local\Programs\Python\Python311\python.exe
----- M E N U -----
Burger      : ₱35.00
